## **DETAILED ACTION**

### ***Election/Restrictions***

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

- A. Figs. 3A-4B and 8, drawn to a suspension having a leaf spring pivotally attached to a vehicle, with a torsion bar fixed to the leaf spring.
- B. Figs. 9A-10, drawn to a suspension having a leaf spring clamped to a torsion bar, and the torsion bar pivotally attached to a vehicle.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include

Art Unit: 3616

all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The claims are deemed to correspond to the species listed above in the following manner:

Claims 5 and 8 relate to Species A.

No claims relate to Species B.

The following claim(s) are generic: 1-4, 6 and 7.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons:

The connection of the leaf spring to the vehicle with the torsion bar being attached to the leaf spring (Species A), is a different inventive concept than having the leaf spring and torsion bar clamped together and attaching the torsion bar to the vehicle (Species B).

A telephone call was made to Christopher J. Fildes on July 29, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to George D. Spisich whose telephone number is (703)
